

Neto Alves

SOFTWARE ARCHITECT

Over a decade designing, scaling and keeping critical systems running in production

Available for a role or a project

ABOUT

The same person models the database, writes the API, ships the front end and runs the deploy — and answers for all four.

SYSTEMS

OSCapstack CRM OPERATIONAL · PROPRIETARY

Commercial operating system for real-estate credit origination, in production.

146 RLS policies · 42 screens

Saturno Labs PROPRIETARY

Autonomous B2B marketing platform that measures a brand's authority inside AI answers.

14 packages · 13 cron jobs

Moveis.pro OPERATIONAL

Multi-tenant SaaS for furniture stores, with CRM and WhatsApp/Instagram operations.

40 models · 3 apps

STACK

Backend: JavaScript, TypeScript, Node, Fastify, NestJS, Next.js, Astro

Data: PostgreSQL, pgvector, Supabase/RLS, Drizzle, Prisma, Redis, Raw SQL

Applied AI: Anthropic, OpenAI, Google, Groq, Vercel AI SDK, Embeddings/RAG, Tool-calling, Guardrails

SEO, GEO & Measurement: Technical SEO, GEO (AI answers), JSON-LD / Schema.org, Custom KPIs, Share of Voice in AI, Core Web Vitals, IndexNow, Blog & RSS feed

Front-end: React, Vite, Tailwind, PWA, three.js

Quality & Delivery: Vitest, Playwright, pgTAP, GitHub Actions, Turborepo, pnpm

Networking & Infrastructure: Cisco, MikroTik, Furukawa, Switching, VPS, DNS, Nginx, Docker, Blue-green deploy, PM2, Heartbeat/uptime

TECHNICAL FOUNDATION

10+ years in infrastructure and networking

Networks, switches and servers before the first system in production. VPS, DNS, Nginx, Docker, blue-green deploys with rollback and messaging integration — the foundation that makes the software I write survive what nobody tested.

CISCO MIKROTIK FURUKAWA

EDUCATION

Telecommunications Technician

Data Analysis

CS50x — Introduction to Computer Science

CS50 AI — Introduction to Artificial Intelligence with Python

CS50B — Computer Science for Business Professionals

CS50L — CS50 for Lawyers
